

**ARTIGO: 11567**

## **SDK Facebook Android - Gerar hash de chave**

### **With certify file**

```
keytool -exportcert -alias androiddebugkey -keystore ~/.android/debug.keystore | openssl sha1 -binary | openssl base64
```

```
# senha padrão android
```

### **Google App Play Sign In:**

You can simply do it, please follow the below steps.

- Go play console and select your app.
- Inside the 'Version' section, click the 'Application Integrity' tab.
- Get SHA1

-- Finally, generate your hash code using the following line of code

```
$ echo 00:00:00:00:00:00:00:00:00:00:00:00:00:00:00:00:00:00:00 | xxd -r -p | openssl base64
```
