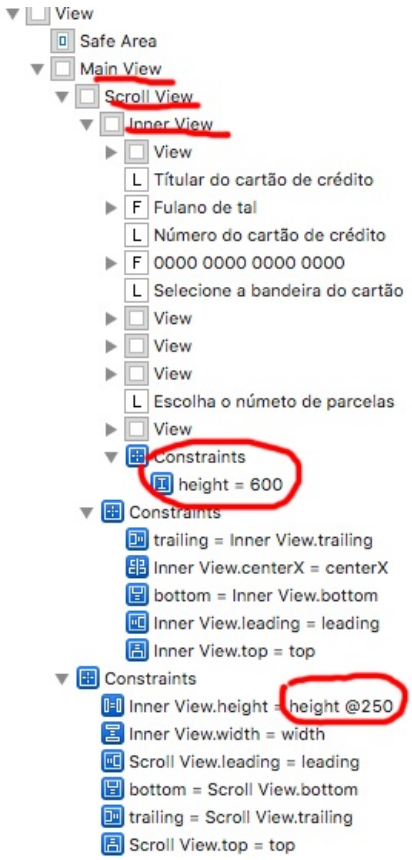
ARTIGO: 11636
XCode + IOS + UIScrollView + AutoLayout


1 - **Add Main View UIView** - keys top: 0, left: 0, bottom: 0, right: 0
2 - **Add UIScrollView** - keys top: 0, left: 0, bottom: 0, right: 0
3 - **Add Inner View** - keys top: 0, left: 0, right: 0 - add height equals Main View and change priority to 250. Now you can change view height to scrolling size. Eg.: 600
4 - Add views items into Inner View
