### docker - unable to allocate file descriptor table

error:

```
library initialization failed - unable to allocate file descriptor table - out of memory.
```

fix:

```
$ sudo vim /usr/lib/systemd/system/docker.service  
  
>>>  
#change this line  
ExecStart=/usr/bin/dockerd -H fd:// --containerd=/run/containerd/containerd.sock  
#to  
ExecStart=/usr/bin/dockerd --default-ulimit nfile=65536:65536 -H fd:// --containerd=/run/containerd/containerd.sock  
<<<  
  
$ sudo systemctl daemon-reload  
$ sudo systemctl restart docker
```
